

I. DOCUMENT CONTROL

Policy Code	NQFL-OPS-POL-BCP-002
Version	1.0
Document Owner	Operations Head
Approval Authority	Board of Directors
Effective Date	01-01-2026
Last Review Date	06-01-2026
Review Cycle	Annual

II. DEFINITIONS

Sl.no	Terms	Definition
1	Office Premise	Office Premise represents the registered office address of Nurofin Quantum Flex LLP (Nurofin) where critical processes function in the BAU mode. The Office Premise is #68, Third Floor, Fourth Main, BDA Layout, Cybele Green Phase 2, Kithaganahalli, Bengaluru - 560036, India.
2	Event	Event is defined as any incident that can impact continuity of business function for a short term or a prolonged duration. Event can be caused by: Organized or deliberate disruptions such as bomb threat, terrorist attack, transport strike, employee strike, riots, bandh, lockdown. Environmental disasters such as drought, earthquake, epidemic, fire, food and water contamination, flood, rainstorms, lightening, thunder, pandemic like COVID-19. Loss of utilities and services such as power outage, loss of internet connectivity, system outage, key personnel unavailable.
3	BCP	Business Continuity Planning (BCP) is the process involved in creating a system of prevention and recovery from potential threat or Event to Nurofin. The plan ensures that personnel and assets are protected and are able to resume their operations within the defined RTO when the DR is activated.
4	BCMS	Business Continuity Management System (BCMS) is a framework for identifying Nurofin's risk of exposure to internal and external threats. BCMS includes disaster recovery, critical function recovery, crisis management, incident management, emergency management and contingency planning.
5	System	System represents all hardware such as servers, laptops, desktops, and other information technology physical assets
6	Data	Data represents all confidential information of Nurofin such as source code, contracts with Client, Delivery Partners and Vendors, customer data and employee data, etc.;
7	Outage	Outage is defined as an interruption to the continuity of identified critical processes which might be triggered by an Event
8	DR	Disaster Recovery (DR) is step of processes and procedures of regaining access and functionality to resume the critical processes after the occurrence of an Event.
9	BAU	Business as Usual (BAU) is the normal functioning of business processes on the Office Premise

Business Continuity Plan

10	RTO	Recovery Time Objective (RTO) defines the no. of minutes / hours / days / weeks Nurofin can afford to wait before the identified critical processes starts functioning. Beyond this duration, if the critical process is not available, it would be losing proposition for Nurofin.
11	RPO	Recovery Point Objective (RPO) is the timeframe in minutes / hours / days / weeks, to which previous point, Data would be recovered should an Event occur. In other words, how much of Data can be unavailable, should an Event occur. This essentially helps Nurofin in identifying the possible backup storage solutions.

III. PURPOSE

This document outlines the preparedness of Nurofin Quantum Flex LLP to ensure the sustenance of critical business functions during the occurrence of Events caused by factors such as organized or deliberate disruptions, environmental disasters, loss of utilities and services. This document defines BCMS processes and procedures that has to be adopted during such Events. The objectives of BCMS are as follows:

- Define the processes and procedures to restore the critical business functions to the widest extent possible within a predetermined time frame.
- Define the processes and procedures to protect sensitive and confidential Data of Nurofin from such Events
- Maintain the integrity and availability of Data and Systems.
- Build resilience into the identified critical processes.
- Ensure the safety and welfare of the employees during such Events.
- Survive the Event and sustain the uninterrupted business operations.
- Implement preventive measures to reduce the likelihood of identified Events
- Execute tested recovery procedures during the Event.

IV. SCOPE

This policy applies to all employees, directors, contractors, consultants, and third-party vendors of Nurofin Quantum Flex LLP ("Nurofin").

It covers all systems, applications, infrastructure, and operational processes supporting Nurofin's role as a Technology Service Provider (TSP) for payout and settlement orchestration platform, including but not limited to:

- Payout API platforms and orchestration layers
- Sponsor bank integrations and connectivity
- Reconciliation and exception handling systems
- Risk management, monitoring, and reporting tools
- Cloud infrastructure and supporting IT systems
- Operational support, merchant support, and bank coordination processes

This policy applies across all locations and operating models, including office premises, work-from-home arrangements, cloud environments, and any approved offsite or backup facilities.

V. THREAT MATRIX & PREVENTIVE MEASURES

Based on the probability of occurrence, the Senior Management of Nurofin has identified the following Events that may lead to an Outage scenario impacting critical payout technology services.

For each Event, an RTO (Recovery Time Objective) has been defined to ensure continuity of critical processes, along with preventive and mitigative measures to reduce both likelihood and impact

S. No	Event	RTO	Preventive Measures Implemented
1	Power Outage at Office Premise	24 Hours	- UPS installed for all critical systems, supporting up to 8 hours - Diesel Generator available in building premises for extended outages - If outage exceeds 24 hours, BCM shall invoke Incident Response Meeting and activate DR
2	Loss of Internet Connectivity	48 Hours	- Connectivity from multiple ISPs - Portable dongles maintained as backup - Work-from-home enabled for operations and technology teams - DR invoked if outage exceeds 48 hours
3	Loss of System (Laptop / Device Failure)	60 Minutes	- Spare laptops maintained at office and offsite - Immediate device replacement for impacted staff - Vendor arrangements for emergency procurement
4	Loss of Data	30 Minutes	- Near real-time cloud backups - Data recovery procedures aligned with backup and restoration policies
5	Key Personnel Unavailability	As per process RTO	- Backup personnel assigned as per Chain of Command Matrix - Cross-training across critical roles - Health, safety, and emergency preparedness measures
6	Office Premise Not Accessible	As per process RTO	- Work-from-home model enabled - Cloud-based infrastructure ensures location independence - DR mode activated if access is unavailable beyond defined RTO

VI. EVENT NOTIFICATION MATRIX

In order to ensure timely escalation and controlled response, Nurofin has defined the following Event Notification framework.

If the expected restoration time exceeds the defined RTO, escalation to the BCP Manager (BCM) or designated authority is mandatory.

S. No	Event	First Point of Contact	Second Point of Contact
1	Power Outage	Operations / Admin Lead	BCP Coordinator / BCM (Business Continuity Manager)
2	Internet Connectivity Loss	DevOps / IT Lead	BCP Coordinator / BCM
3	Loss of System	Operations Manager	BCP Coordinator / BCM
4	Loss of Data	Technology / DevOps Lead	BCP Coordinator / BCM
5	Key Personnel Unavailability	Reporting Manager	BCM
6	Office Premise Inaccessible	Operations Lead	BCP Coordinator / BCM

VII. DISASTER RECOVERY PROCEDURES

Nurofin follows a structured, five-stage Disaster Recovery process whenever an Event is identified or reported.

A. Evaluation & Declaration

- Any employee becoming aware of an Event must report it immediately using the Event Notification Matrix
- If restoration within RTO is not feasible, escalation to BCM is mandatory
- BCM convenes an Incident Response Meeting
- Impact on payout APIs, bank connectivity, reconciliation, and operations is assessed
- If expected restoration exceeds defined RTO, authorized personnel may declare a Disaster and activate DR mode

B. Notification

To prevent misinformation and operational chaos:

- Communication is controlled and role-based
- Employees, banks, merchants, and relevant stakeholders are informed through predefined channels
- Regulatory or contractual notifications are coordinated with sponsor banks where applicable

C. Emergency Response

- Employee safety is prioritized
- Evacuation and first aid initiated if required
- Remote working or relocation to backup facilities facilitated
- Operations teams ensure continuity of critical payout support functions

D. Invoking DR Mode

- BCM coordinates with Technology and Operations teams
- Backup systems, cloud failover, and alternate connectivity activated
- Manual controls may be applied for reconciliation and exception handling if required
- Ongoing monitoring and periodic Incident Response Meetings conducted

E. Resumption of Business as Usual (BAU)

- BCM confirms service readiness and stability
- Incident Report is prepared with root-cause analysis
- Preventive measures are identified and implemented
- Authorized authority declares resumption of BAU
- Formal communication is issued to all stakeholders

VIII. Governance & Oversight

The Board of Directors of Nurofin holds ultimate authority for the approval, oversight, and periodic review of this policy.

Senior Management is responsible for:

- Implementing this policy
- Allocating resources for BCP readiness
- Ensuring compliance with regulatory and contractual obligations
- Monitoring effectiveness of continuity and recovery controls

IX. Compliance & Enforcement

Failure to comply with this policy may result in:

- Disciplinary action
- Suspension or termination of system access
- Termination of contracts for vendors or partners
- Legal or regulatory action where applicable

All deviations or exceptions must be formally documented, risk-assessed, and approved by authorized management.

X. Review & Maintenance

This policy shall be:

- Reviewed at least annually, and
- Reviewed additionally upon:
 - Significant regulatory changes
 - Material operational or technology changes
 - Major incidents or disasters

Revisions shall be approved by the Board of Directors.
